

Precision Bevel

We bevel better, faster, cheaper

FasRapid LGA 3000 II High-Performance Grinding Beveler

Now you can own one of the most powerful, accurate, and versatile grinding bevelers available.

- The FasRapid LGA 3000 II is a CNC-controlled, 10' wide beveler that can accommodate up to 4" thick material and apply 4"+ wide bevels over a wide angle-range (0°-80°).
- Plate longer than 10' can be indexed through the machine in multiple steps.
- Bevels are consistent, precise and repeatable with a ground finish that doesn't require any after-treatment.
- At the same time, the FasRapid is a budget saver due to its high efficiency and very low operating costs.
- Smaller and larger machines are also available.

FasRapid LGA 3000 II Beveler Features:

- Plate thickness up to 4"
- Angle range: 0-80°
- Bevel width up to 4"
- No heat affected zones
- Highly efficient
- Low operating costs
- Manual and automatic modes
- Large job-memory capacity
- Optional dual angle module
- Continuous bevel module
- Pocket bevel module

Bevel any material:

- Carbon Steel
- Stainless Steel
- Nickel Alloys
- Armor Plate
